PROFESSIONAL SUMMARY

I'm a product-focused web developer with 1 year of experience building fast, responsive, and scalable web applications using modern frameworks like Next.js. I focus on writing clean code, crafting intuitive user interfaces, and turning ideas into real-world digital products that perform.

SKILLS & INTERESTS

- **BACK-END DEVELOPMENT** : Node.js | Express.js | JavaScript | MongoDB | Rest Api | PHP | MYSQL
- **FRONT-END DEVELOPMENT** : Next js | React | HTML | CSS | JavaScript | TypeScript | Material UI | Tailwind CSS | shadcn/ui | GSAP | Flutter
- **LIBRARIES AND TOOLS**: Postman | Git and GitHub | JQuery | Redux Toolkit | React Router Dom | Vercel | Render | Sanity Studio | Prisma | Sentry | Next Auth | Puter.js
- **SOFT SKILLS** : Team player | Bias to action | Deliver result

EXPERIENCE

Wisdom Tooth Technologies

[Full Stack Developer]
May 2025 – Present | Bengaluru, India

- **Developed and deployed a responsive web application** for a marble and cement company using Next.js, React, Tailwind CSS, and Prisma ORM.
- **Designed and integrated a scalable MySQL database with Prisma**, implementing efficient APIs and backend logic to support dynamic content and user-driven interactions.
- **Converted Figma designs into pixel-perfect, responsive UI components**, ensuring consistent branding and a smooth user experience across devices.
- **Implemented performance optimizations**, including lazy loading, dynamic routing, and interactive UI behaviors to improve speed and engagement.

edumerge

[Software Engineer Intern]
Dec 2024 – Apr 2025 | Bengaluru, India

- Contributed to the development of the **College ERP system** within the **Edumerge app**, which has **over 100k downloads on the Play Store** and is used by educational institutions globally.
- Focused on the **Student Information System (SIS)** module, implementing critical academic workflows including **Promotion, Demotion, Detainment, Dropout, Graduation Clearance, ID card viewing, and Login credential display**.
- Built and maintained a scalable **PHP backend** and developed **responsive React.js frontends**, ensuring smooth performance and user experience across devices.
- Designed efficient **MySQL database schemas** and optimized queries to enhance system speed, while also assisting the support team in troubleshooting and resolving customer issues.

JSpiders - Software Testing Training Institute

[Mern Full Stack Developer]
june 2024 – dec 2024 | Bengaluru, India

- **Applied MERN stack expertise to build responsive, user-centric web applications**, actively contributing to full project lifecycles during a hands-on internship.
- **Integrated React.js, Node.js, Express, and MongoDB** to develop scalable full-stack solutions with seamless frontend-backend communication.
- **Resolved real-world development challenges through efficient debugging**, enhancing both problem-solving and critical thinking skills.
- **Collaborated in an agile environment**, strengthening code quality, deployment readiness, and practical knowledge of production workflows

EDUCATION

Yenepoya Institute Of Technology mangalore Course : Bachelor Of Computer Science And Engineering CGPA : 8.1/10	2020 -2024
Gunashree Vidyalaya Siddakatte mangalore Course : SSLC Percentage : 80	2018
Alvas Pre University College,Moodbidri Course : PCMC Percentage : 84	• 2018 -2020

PROJECT & SHOWCASE

YC Directory – Startup Discovery Platform

[Next.js 15 • Sanity CMS • Tailwind CSS • SSR & Auth •shadcn]

- Developed a full-stack web application that enables startup founders to create and showcase their ventures, allowing global users to explore and discover innovative companies.
- Implemented dynamic content management using Sanity CMS, enabling real-time updates to startup profiles and posts without redeployment.
- Utilized Next.js 15 with SSR (Server Side Rendering) and Parallel Routes (PPR) to deliver fast, SEO-friendly pages and an optimized user experience.
- Built secure user authentication and role-based access, ensuring only verified founders can publish while visitors can seamlessly browse the directory.
- Live Demo: [YC Directory – Startup Discovery Platform](#)

Store-It – A Modern Cloud Storage Platform

[Next.js 15 • Appwrite • Tailwind CSS •shadcn • charts]

- Built with Next.js, Appwrite, Tailwind CSS, and TypeScript, Store-It offers users a seamless experience to upload, view, rename, delete, and search across various file types (images, videos, audio, documents) — replicating core Google Drive functionalities..
- Integrated React Flow and Appwrite’s Auth module to ensure role-based access, secure login/signup, and fine-grained user permissions, enabling private or shared access with other users.
- Users can share files securely, control access levels, and view file metadata like upload date, size, and type. Future-ready architecture supports easy addition of collaborative features like comments or version history..
- Designed a responsive, accessible, and mobile-friendly UI using Tailwind CSS, optimized for performance and scalability — ensuring a smooth experience across all devices.
- Live Demo: [Store-It – A Modern Cloud Storage Platform](#)
-

Resume Analyzer AI

- Developed a full-stack AI-powered Resume Analyzer web app using React Router v7, TypeScript, JavaScript, Tailwind CSS, and Puter.js to evaluate ATS (Applicant Tracking System) compatibility of user resumes.
- Implemented secure user authentication and role-based authorization, enabling users to register, log in, and access personalized ATS feedback securely.
- Built dynamic resume scoring system where users enter job title, company, and job details, and upload their resume to receive real-time ATS score and actionable AI-driven suggestions for improvement.
- Integrated intelligent resume parsing and analysis logic to detect missing keywords, formatting issues, and alignment with job descriptions, enhancing resume relevance and visibility in recruiter filters.
- Focused on user experience and accessibility, using Tailwind CSS for responsive UI and seamless navigation with React Router v7, ensuring fast and intuitive multi-step resume evaluation flow
- Live Demo: [Resume Analyzer AI](#)

AI-Powered Interview Simulator

[Next.js • React.js •Tailwind CSS • shadcn • Firebase • Santry • Stripe • vappi]

AI-Powered Interview Simulator

- A cutting-edge web platform where students, professionals, and experienced candidates can simulate real interviews. Users input their role, tech stack, experience level, and number of questions, and an AI recruiter generates a tailored interview instantly.

Interactive Dashboard Experience

- Users can access a dedicated dashboard to take their AI-generated interviews. Each session is interactive, voice-enabled, and contextual based on the user’s specified inputs, providing a realistic interview environment.

Detailed Performance Feedback

- After completing the interview, users receive a comprehensive score out of 100, along with personalized improvement suggestions. They can retake interviews as many times as needed to improve their readiness.

Modern Tech Stack

- Built using Next.js for the frontend, Vapi for voice generation, ShadCN UI for reusable components, and Firebase for authentication, database, and storage (bucket). The system ensures smooth performance and real-time scalability.

Monetization & Traction

- The platform is already showing strong traction with over ₹30,000 in revenue, indicating high user engagement and value in the job preparation space.
